

Water Quality Program Manager (Lead and Copper)

Come join our team and help us protect public health and ensure lead-free drinking water in Greater Portland.

The Portland Water District is seeking a skilled project leader to build and lead a multi-disciplinary team that will ensure the District's full compliance with all aspects of the Lead and Copper Rule Revisions (LCRR). This effort will involve building and leading a cross-departmental team responsible for investigating and documenting water system materials, overseeing water quality monitoring at customer taps, and leading an outreach effort so that municipal officials, customers, school staff, the media, and regulators are aware of progress and along the way.

The ideal candidate will possess knowledge of the LCRR and other state and federal drinking water regulations, two or more years of experience managing projects of regulatory and/or public health significance (preferably in in lead and drinking water), and a Bachelor's Degree in public health, statistical science, biology, environmental science, engineering or a related field. They will have a demonstrated ability to direct staff and manage multiple projects simultaneously. Fluency with computer programs including Microsoft office products, databases, asset management programs and GIS software is necessary.
